BANQUE MISR

Analytical Performance Report

Customers | Transactions | Loans | Branches

Insights and recommendations from the Power BI dashboard

1. Executive Summary

This report presents a thorough data analysis of **Banque Misr**, covering its core operational areas: customer demographics, account balances, transaction activity, loan portfolio health and branch productivity.

The primary goal of the dashboard is to give executive stakeholders clear, data-driven insight into customer behavior, portfolio risk, channel usage and regional growth opportunities.

Headline findings

- **Strong deposit base:** 1,000 customers hold 1,243 accounts with a total balance of 299.4M EGP.
- **Wealth is concentrated:** the 100 VIP customers (10%) hold about 70% of all balances.
- **Credit risk needs attention:** 8.3% of loans are in default, rising to 11.0% in the Retail segment and 11.6% for mortgages.
- **Branch resources are uneven:** staffing levels do not track productivity across the 20 branches.

2. High-Level Performance Overview

Key Metric	Summary Value
Total Customers	1,000
Total Accounts	1,243
Total Portfolio Balance	299.4 Million EGP
Total Transactions	4,000
Total Loan Value	237.4 Million EGP
Overall Default Rate	8.3%

Key Observations

- **Customer Segmentation:** Retail customers make up the majority at **60%**, followed by Mass customers (**30%**) and VIP clients (**10%**).
- **Balance Breakdown:** Deposits are evenly spread across account types: **Fixed (35.22%)**, **Current (32.66%)** and **Savings (32.12%)**.

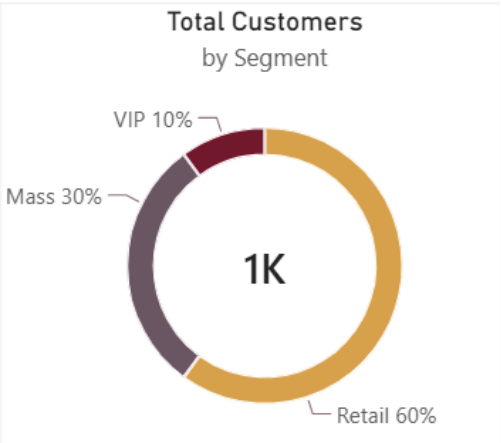

Figure 1: Customers by segment

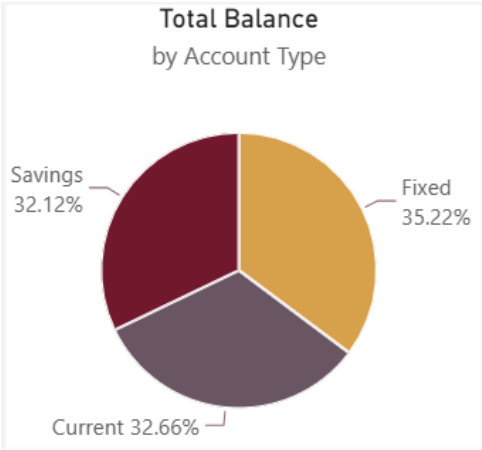

Figure 2: Balance by account type

- **Regional Balance Leaders: Mansoura** leads with **78M EGP**, followed by **Assiut (58M)**, **Cairo (55M)** and **Giza (51M)**. Alexandria (31M) and Tanta (27M) trail.

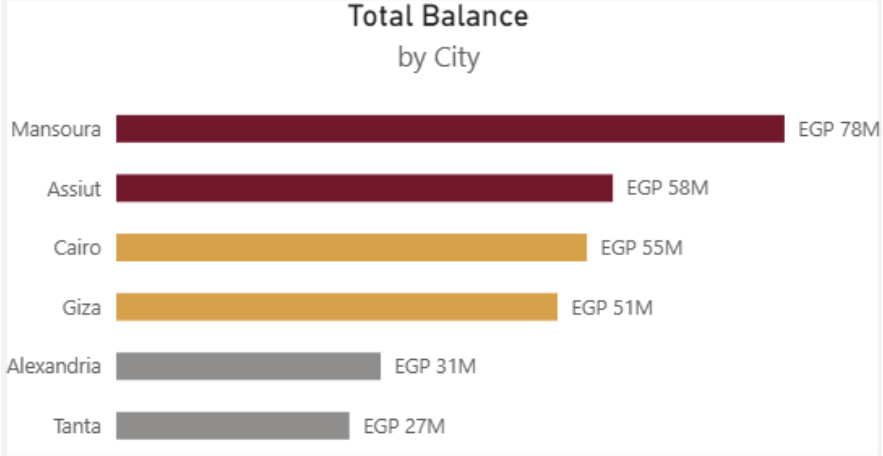

Figure 3: Total balance by city

- **Monthly Transaction Trend:** Total transaction amount ranges from about **5.6M EGP** (February, September) to **7.7M EGP** (November), with additional peaks in June (7.2M) and August (6.9M).

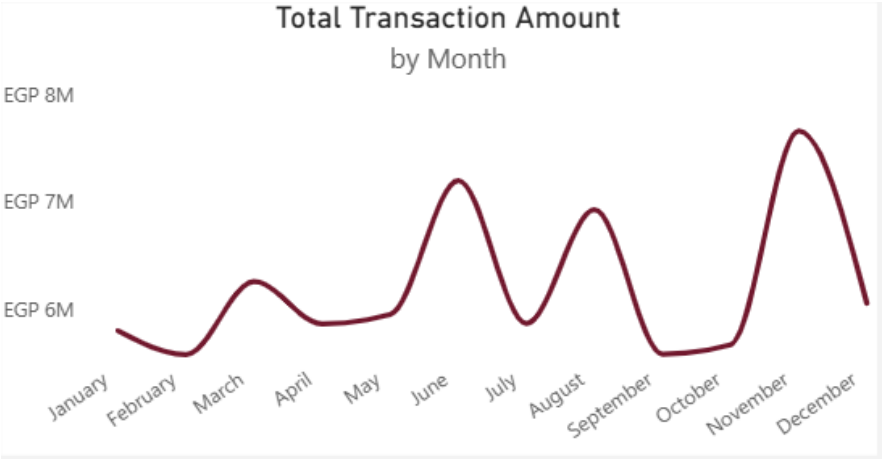

Figure 4: Total transaction amount by month

3. Customer Insights & Demographics

- **Gender Balance:** The customer base is evenly split, with **50.3% Female** and **49.7% Male** customers.
- **Income Overview:** The average monthly income per customer is **38.63K EGP**, with an average balance per account of **241K EGP**.

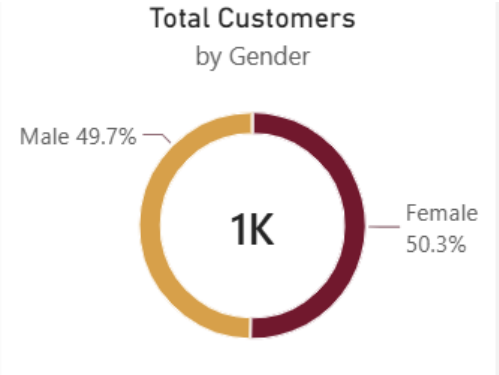

Figure 5: Customers by gender

- **VIP Profile:** The **100 VIP customers** hold **210.3M EGP**, about **70%** of the total balance. Mass customers hold 61.8M EGP and Retail customers only 27.3M EGP, even though Retail is 60% of the base.

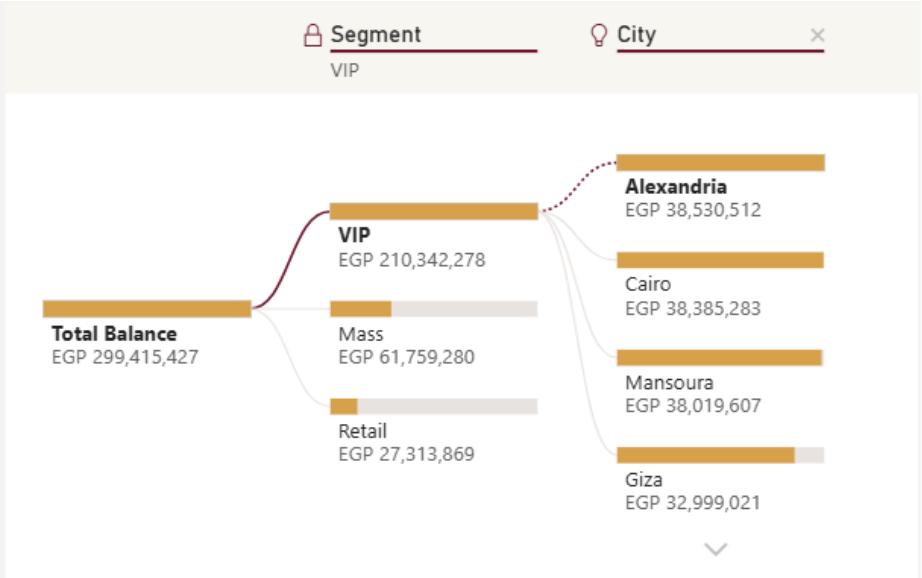

Figure 6: Total balance by segment, with the VIP balance split by city

- **Top Income Profiles:** Senior Managers (**70K**), Business Owners and Doctors (**64K**) and Consultants (**63K**) are the highest earners. Retired customers are the lowest at 19K EGP.

4. Transaction Analysis & Channel Usage

- **Channel Distribution:** Transactions are evenly spread across channels:
  - **ATM:** 34.15%
  - **Online Banking:** 33.95%
  - **Branch:** 31.90%

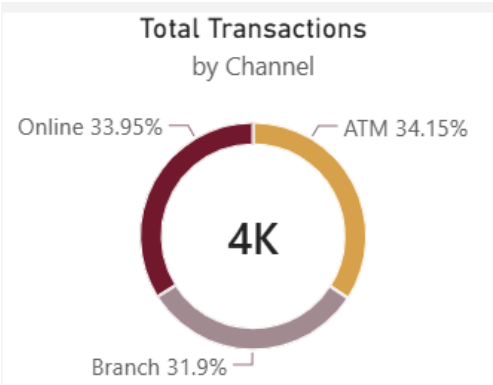

Figure 8: Transactions by channel

- **Activity Metrics:** There are **4,000 transactions**, averaging **4 per customer** at an average amount of **18.59K EGP**.
- **Busiest Branches: Branch 4** (255 transactions), **Branch 9** (250) and **Branch 2** (226) handle the most transactions.

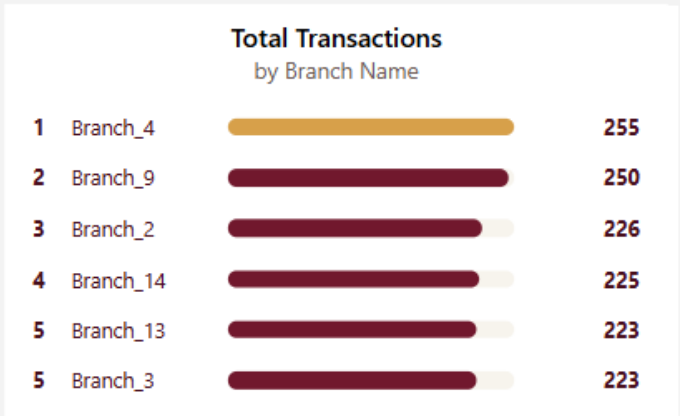

Figure 9: Total transactions by branch

- **Monthly Pattern:** Transaction amounts peak in June and November (**7.2M** and **7.7M EGP**) and are lowest in February and September (**5.6M EGP**).

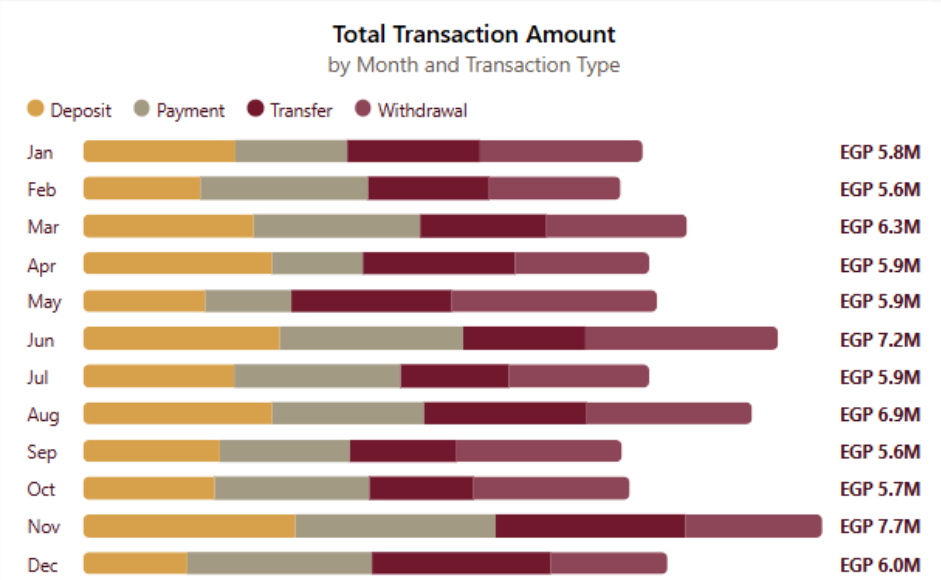

Figure 10: Total transaction amount by month and transaction type

- **Net Cash Flow:** Net cash flow is positive for the year at **335K EGP**, but the monthly picture is volatile, with **6 months in surplus and 6 in deficit**.
  - **Strongest months:** November (+793K), April (+584K) and March (+318K).
  - **Weakest months:** May (-861K), September (-285K) and October (-262K).
  - **Scale of the swings:** surplus months add up to about 2.11M EGP and deficit months to about 1.77M EGP. May's deficit alone is more than 2.5 times the annual surplus.
  - **Pattern:** November's surplus coincides with the busiest month for volume (7.7M EGP), while most deficits fall in quieter months (February, May, September, October).

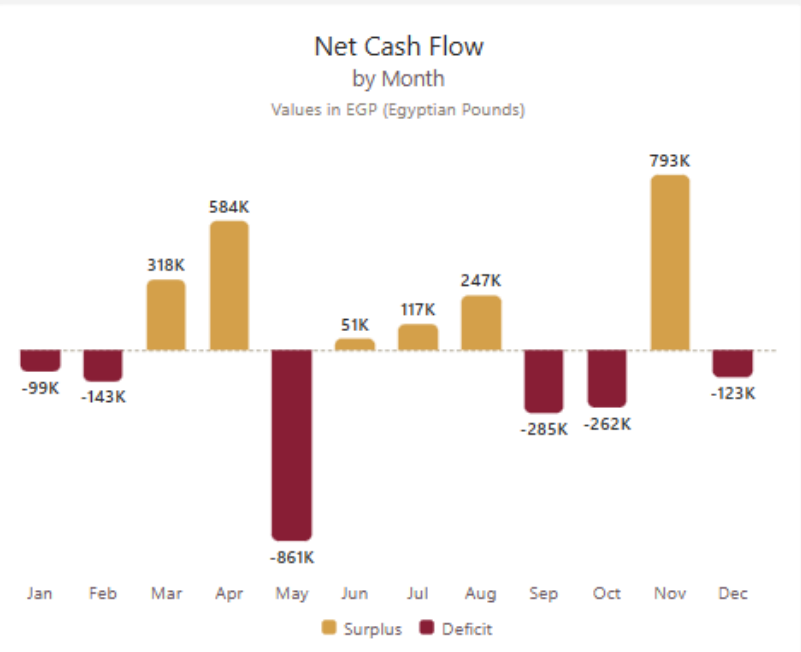

Figure 11: Net cash flow by month (surplus in gold, deficit in maroon)

5. Loan Portfolio & Risk Performance

- **Total Loans: 600 loans** worth **237.4M EGP**, with an average installment of 6,595 EGP.
- **Loan Distribution by Status:**
  - **Active:** 391 loans (65.17%)
  - **Closed:** 159 loans (26.5%)
  - **Defaulted:** 50 loans (8.33%)

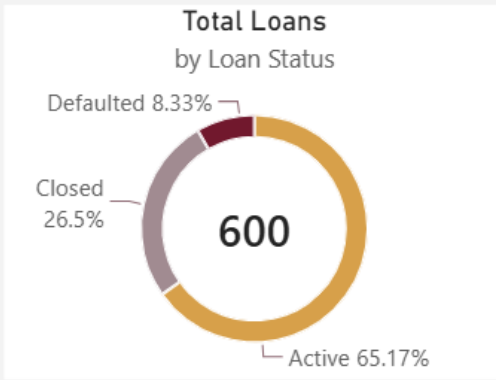

Figure 12: Loans by status

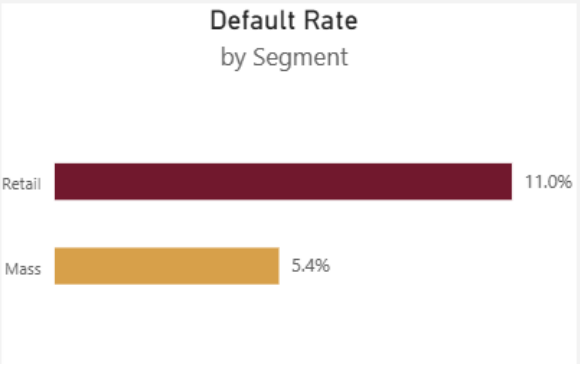

Figure 13: Default rate by segment

- **Default Analysis by Segment:** The **Retail** segment shows a clearly higher default rate of **11.0%**, against **5.4%** for **Mass** customers. No default rate is shown for the VIP segment.
- **Loan Types by Value: Car** loans are the largest by value (**97.2M EGP**), followed by **Personal (78.7M)** and **Mortgage (61.5M)**.
- **Loan Types by Count: Personal** loans are the most numerous (**212**), followed by Car (199) and Mortgage (189).
- **Defaults by Loan Type: Mortgage** has the highest default rate (22 of 189 loans, **11.6%**), then Personal (18 of 212, 8.5%) and Car (10 of 199, 5.0%).

6. Branch Network & Operational Efficiency

- **Network Scope: 20 branches** across 6 cities with **506 employees** (25.3 per branch), serving 1,000 customers.
- **Staff Productivity:** The network averages **7.9 transactions per employee**.
- **Top Branches by Balance:**
  - **Branch 9:** 28.6M EGP
  - **Branch 19:** 23.0M EGP
  - **Branch 2:** 20.5M EGP

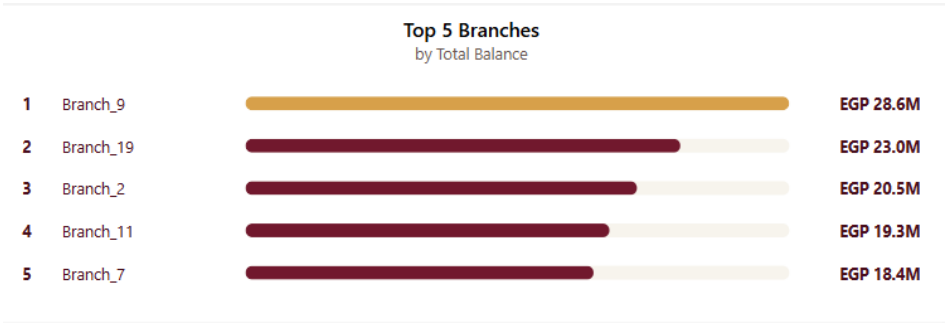

Figure 16: Top 5 branches by total balance

- **Account Concentration by City: Cairo** holds the most accounts (**316**), followed by **Mansoura (267)**, **Giza (222)**, **Assiut (192)**, Alexandria (133) and Tanta (113).
- **Balance per Account:** Cairo averages only about **174K EGP** per account, against roughly 290K–300K EGP in Mansoura and Assiut (derived from city balance divided by accounts).

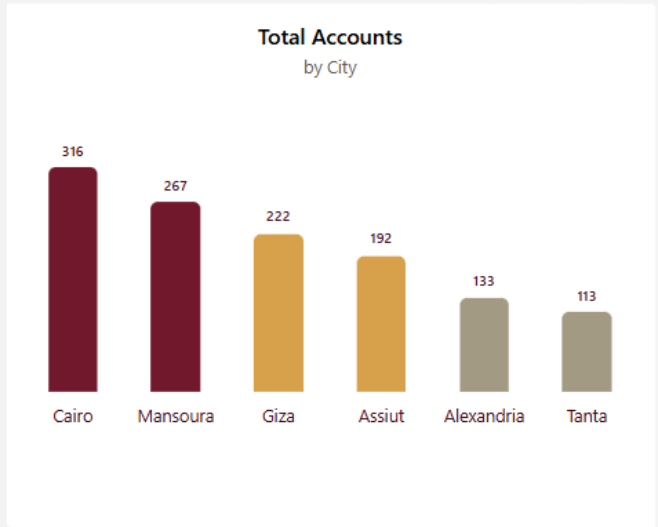

Figure 17: Total accounts by city

- **Staffing vs. Productivity: Branch 16** (41 staff, 4.3 transactions per employee) and **Branch 8** (38 staff, 3.7) are the most heavily staffed yet far below average. **Branch 9** (29 staff, 8.6) is the most productive.

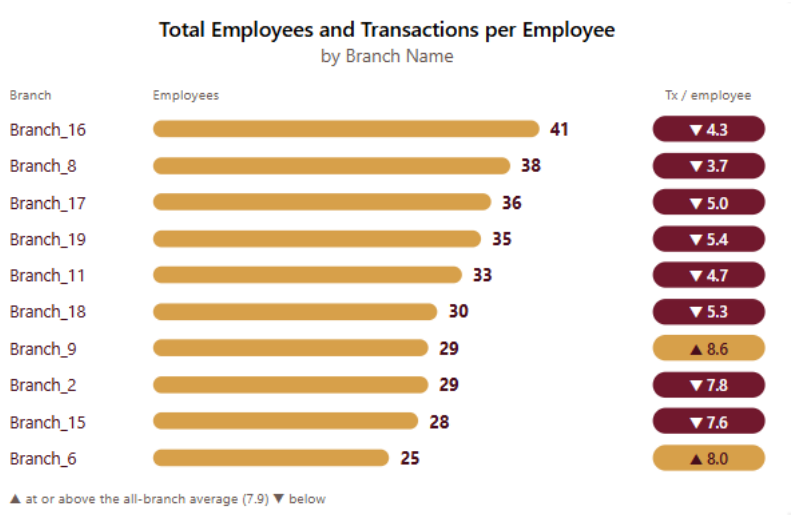

Figure 18: Employees and transactions per employee by branch

7. Key Insights

#	Insight	Supporting Evidence
I1	**VIP customers hold most of the wealth.**	The 100 VIP customers (10%) hold about 70% of the 299.4M EGP balance, while Retail (60% of customers) holds only about 9%.
I2	**Retail borrowers carry the highest default risk.**	Retail default rate is 11.0% against 5.4% for Mass.
I3	**Mortgages are the weakest loan type.**	Mortgage defaults reach 11.6% (22 of 189), against 8.5% for Personal and 5.0% for Car.
I4	**Cairo has volume but not depth.**	Cairo has the most accounts (316) but about 174K EGP per account, against roughly 290K–300K in Mansoura and Assiut. Customers hold only 1.2 accounts each.
I5	**Branches still carry a third of the transactions.**	ATM 34.2%, Online 34.0% and Branch 31.9%, so there is room to move routine activity to digital channels.
I6	**A positive year hides volatile cash flow.**	Six surplus and six deficit months. May (-861K) is more than 2.5 times the annual net of 335K, while November (+793K) is the peak.

8. Strategic Recommendations

#	Recommendation
R1	**Tighten credit assessment for Retail borrowers.** Add income and debt-to-income checks and tiered limits for the Retail segment.
R2	**Review mortgage underwriting.** Revisit loan-to-value limits, collateral requirements and co-signer rules for mortgages.
R3	**Launch a VIP wealth management programme.** Offer dedicated relationship managers, premium fixed-deposit products and investment advisory to protect and grow the segment holding 70% of balances.
R4	**Deepen relationships in Cairo.** Run cross-selling campaigns (savings, fixed and current account bundles) to raise balance per account and accounts per customer.
R5	**Rebalance branch staffing.** Move staff from low-productivity branches such as 16, 8 and 17 to high-demand branches, and replicate the Branch 9 operating model.
R6	**Continue the digital transformation.** Keep improving the online banking experience and ATM self-service so branches can focus on advisory work and reduce operating overhead.
R7	**Build a liquidity and cash-flow buffer plan.** Forecast monthly net cash flow, hold reserves ahead of deficit-prone months (Jan-Feb, May, Sep-Oct, Dec) and time deposit campaigns for those months.
